Get Started with Profiler

Profile from within IDE...

Install plugin for your IDE to enable one-click profiling of Java servers and applications, as well as source code navigation from the profiling results.

Profile local Java EE server or application...

Integrate with a local Java EE server to let it start with YourKit Profiler agent or get instructions how to enable profiling in your Java application.

Profile remote Java EE server or application...

Profile remote Java EE server or a Java application started with YourKit Profiler agent or attach the agent to a remote Java process.

Profile inside Docker container

Open instructions on how to profile inside Docker.

Help and Demo

How to profile in my scenario?

FAQ how to profile from command line, in Amazon EC2, etc.

Help

Documentation, demos, knowledge base and forum.

Profile demo

Profile a demo application to get familiar with YourKit Java Profiler features.

Snapshots

Open snapshot...

Open and manage YourKit performance and memory snapshots, as well as snapshots in HPROF format.

Monitor Applications

⚙ 🔍 + − ✏ ▼	▲ Name	CPU	User	PID
